

## Green Day Transport Survey

Control Day: Tuesday 6<sup>th</sup> November 2012

- On Tuesday all classroom teachers conducted a survey, asking the children how they had travelled to school that day. The following pie chart represents our findings:

Tuesday 6<sup>th</sup> November

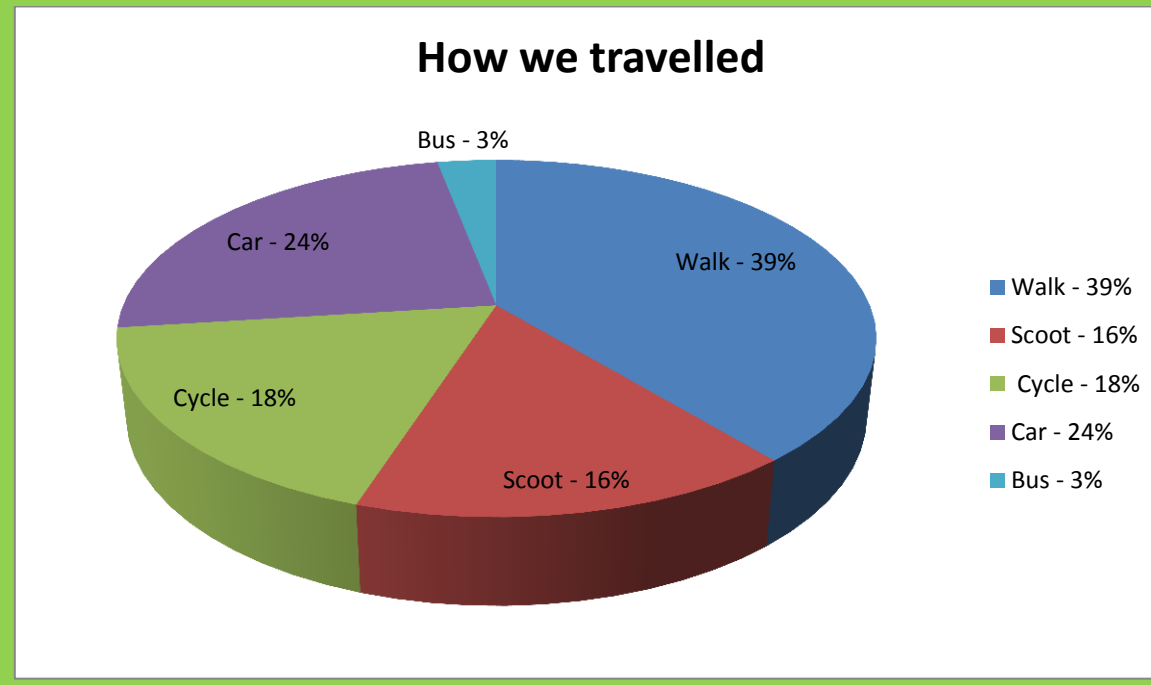

**How did the pupils in St. Paul's N.S. travel to school?**

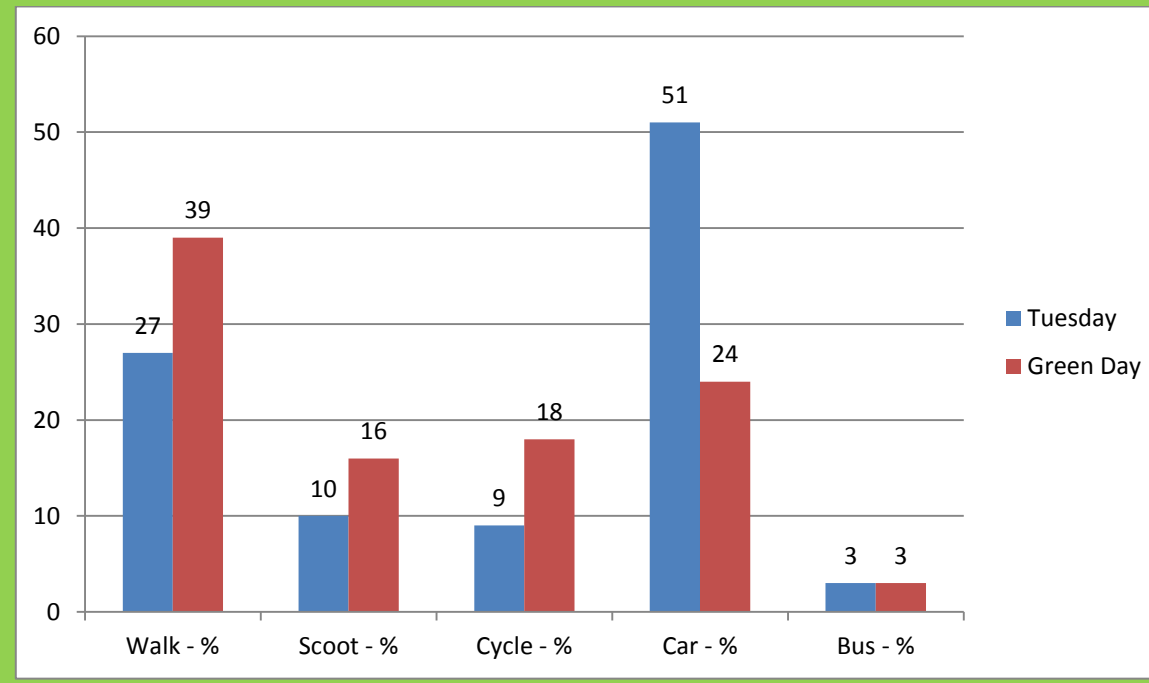

**Green Day: Wednesday 7<sup>th</sup> November 2012**

On Wednesday all classroom teachers repeated their survey, asking the children how they had travelled to school that day. The following pie chart represents our findings:

**Wednesday 7<sup>th</sup> November**  
**How did the pupils in St. Paul's travel to school?**

## Comparing our results

- On Tuesday a huge 54% of pupils travelled to school by either car or bus. This uses fuel and, as a result, increases our carbon footprint. On Green Day that figure had been reduced to just 27% - a 50% reduction!! Well done everybody!!
- We are delighted with our results and this just proves that when we make an effort to leave the cars behind and walk, cycle or scoot to school we are keeping fit, saving energy and helping the environment to be a cleaner, greener place.
